

REVOLUTIONARY REVERSE CAMERA

Is your camera safe enough?

- Maximize your safety with a view that covers all blind spots on both rears of the vehicle.
- Use the best 180° camera to cover a much larger area than a conventional rear view camera.
- Provides a 2-in-1 display image with both a horizontal rear view and a bird's eye view.
- Includes an active monitoring function to detect moving objects.

INNOVATIVE IMAGE PROCESSING TECHNOLOGY

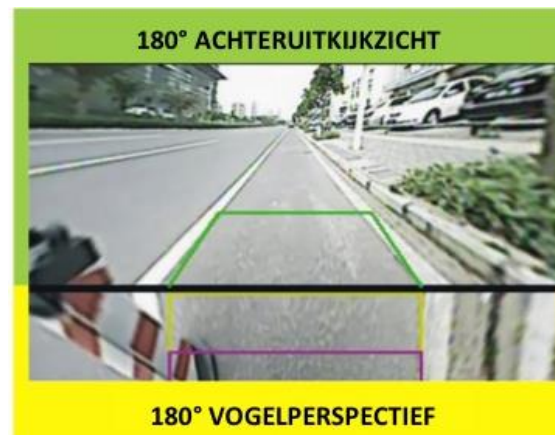

180° camera offers a much wider view.
This makes blind spots visible on the display.

Anti-distortion technology
corrects it to
'fish eye' effect.

Horizontal vision became
converted to
bird's eye view.

A 2-in-1 view of both the horizontal view and the
bird's eye view is displayed on the LCD monitor.

THE MOST PRACTICAL REAR VIEW CAMERA SYSTEM
FOR EVERYONE!

PRACTICAL AND IDEAL

THE WORLD'S SAFEST REVERSE CAMERA SYSTEM!

The camera system provides a complete picture
that not only covers the blind spots,
but also detects moving objects. The unwanted
potential danger becomes
detected and made visible on the LCD screen.

**Bij het achteruitrijden vanuit een parkeerplaats
of een garage gebeuren er ernstige ongevallen**

The position of the moving
object is indicated
by a red frame.

A pop-up screen
warns in advance of an
Incoming object.
